style with strength

the composite collection

style with strength

The Hurst Composite Door Collection is a breakthrough in door technology, combining proven levels of high security with incredible good looks...

...in fact quite simply, a door that possesses superior style with strength.

Official police security initiative

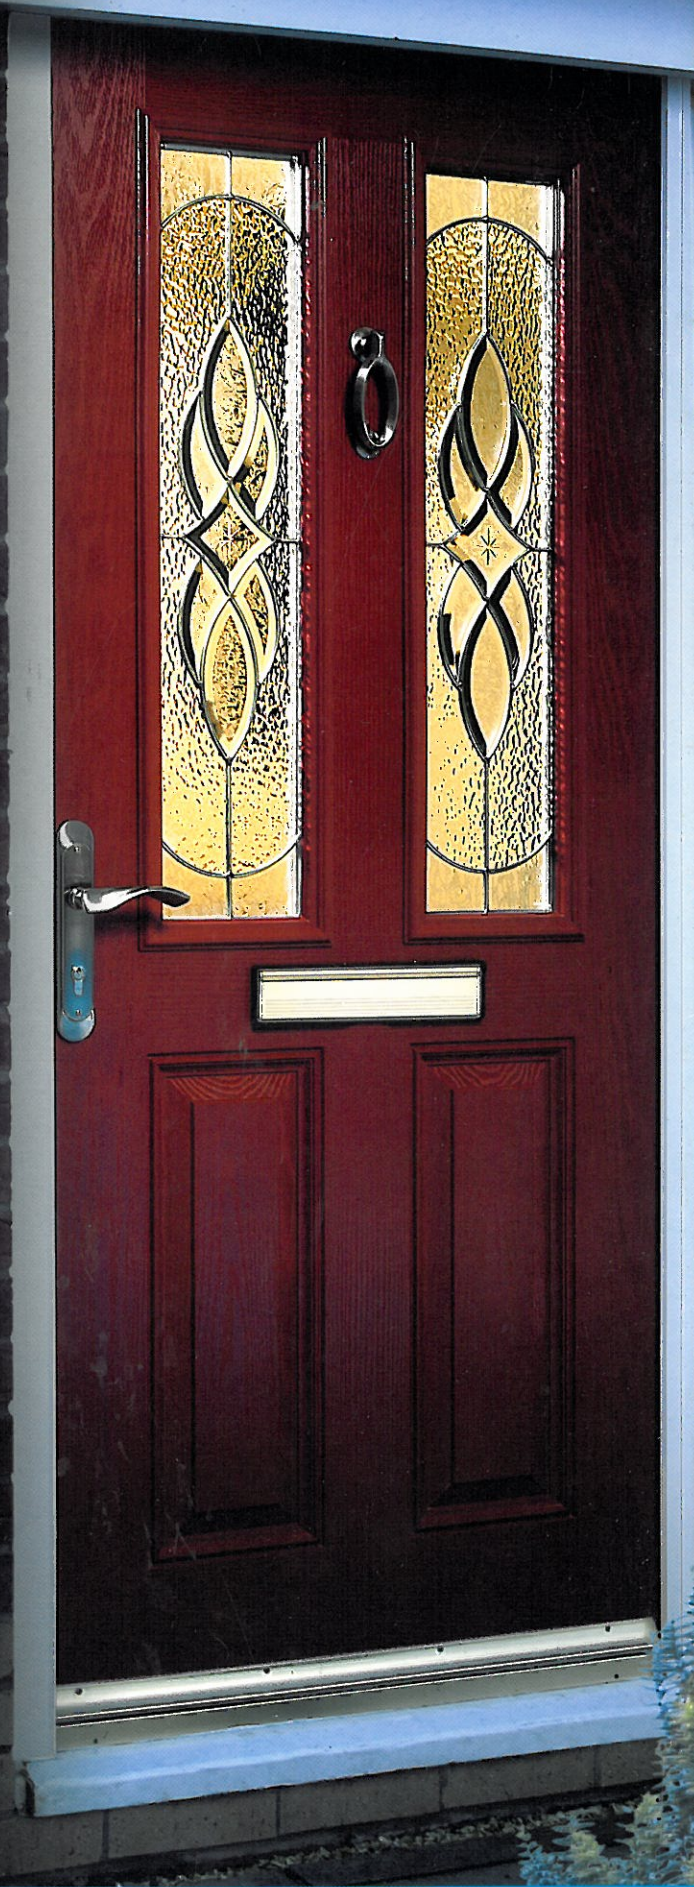

The Composite Door set is available to meet the requirements of the Secured By Design Licence, the official police initiative backed by the Home Office Crime Reduction Unit.

PAS 23 **Weather performance** - certified accreditation for performance against extreme weather conditions.

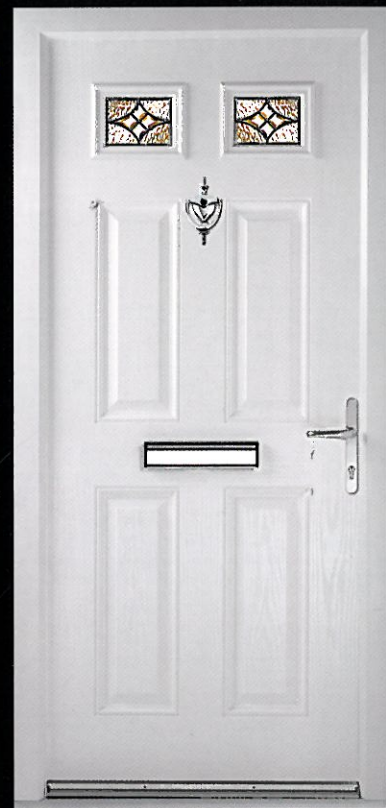

PAS 24 **Security performance** - certified accreditation for performance against extreme physical attack methods used by intruders.

Peace of mind - guaranteed for a full 10 years, so you can rest assured your Composite door is as durable as it is stylish.

“The Hurst Composite door features a slab with true woodgrain aesthetics without the inherent defects or marks.”

compositefiredoor

The Hurst Composite Door is now available with British Standard Fire Door Certification on selected ranges.

Outwardly these doors are indistinguishable from our main composite range of doors, thereby offering you a truly aesthetically pleasing door with an unsurpassed level of safety and peace of mind that will keep out both fire and intruders alike.

Unlike most fire doors the Hurst Composite range are available with specially developed PVC-U frames also conforming to BS476 fire regulations providing the benefit of a matching maintenance free frame to keep the entrance to your home in complete harmony, looking good and feeling safe.

- 30 minute Fire Door confirms to BS476:Part 22:1987
- Available as a solid or half glazed door in white only
- Hung in a specially adapted matching PVC-U frame
- Fire retardant letterplates and door viewers are available to accompany the range
- Outwardly indistinguishable from our main range of composite doors.

Glazed fire doors are supplied with Georgian wired glass as standard.

specifications

The low maintenance option

Guaranteed not to warp, twist or flake. The Hurst Composite Door has its colour permanently locked into the outer skin and will never need to be painted while the glazing is simply fitted using integrated glazing cassettes.

Our clip together glazing cassette utilises a unique, patented, hardened steel clip system which holds the glazing securely in place and eliminates the need for unsightly screw cap covers.

This combined with the option of a resilient fast fit edging strip and the very latest locking systems, the Hurst Composite Door takes the cost out of maintenance.

Safe and Secure

The Hurst Composite Door is fitted with the very latest Yale multipoint locking system, endorsed by the

Master Locksmiths Association and all leading UK insurance companies.

Thresholds and Weather Bars

The Hurst Composite Door set can be supplied with a choice of threshold specifications including low threshold sections that meet the BS6375 Part 1 Class C (Severe) weather test and height restrictions of Part M. Fitted with a unique thermal break our low threshold prevents cold transfer while offering no obstacle to wheeled traffic or the walking disabled.

Tested by Experts

The Hurst Composite Door has been independently tested and achieved full accreditation for the stringent PAS 23/24 standard including the new clause 11 that covers severe physical attack on the lock cylinder and door handle.

Weather performance – certified accreditation given to door sets that prove themselves to be fit for purpose after testing to various extreme weather conditions.

The Hurst Composite door also complies with the latest requirements of PAS 23, Annex 'D' and has undergone extreme thermal performance testing to guarantee it withstands the adverse effects of extreme weather conditions.

Enhanced security performance – certified accreditation gained after independent testing against extreme physical attack using various methods that replicate those commonly used by unwanted intruders.

In all test situations the Hurst Composite Door Set surpassed the required standards.

Secured by Design

The Hurst Composite Door set is available to meet the requirements of the Secured by Design Licence.

This police initiative backed by the Home Office Crime Reduction Unit is designed to encourage the building industry to adopt the use of crime prevention products in new building or home refurbishment.

ISO 9002

This certification ensures that the manufacture of the Hurst Composite Door set follows a stringent quality management system and a set of fully traceable procedures throughout.

Helping the Environment

Designed to cut heat loss through its thermally efficient construction, the Hurst Composite core utilises only a small amount of timber which is from a sustainable resource.

The Hurst Composite door is fitted with the very latest Yale multipoint locking system.

Our strong interlocking clip system holds the glazing cassette in place.
