## ProStyle Espag Handles

The off-set ProStyle espag handle, designed by Mila's in-house product development team, features a contemporary rose and screw cover cap design.

Design registered, the rose cleverly conceals an internal 90° stop which prevents the gearbox from being overstressed and, in turn, a colour matched edge-to-edge screw cap covers the whole of the rose. This

results in a handle with minimal, modern sight lines.

The ergonomic button assembly provides smooth operation and is available in locking, push button and green button egress versions for emergency exit.

The ergonomic tear drop lever offers style whilst providing optimum comfort when in use.

Manufactured from a high performance zinc alloy, the ProStyle espag handle has been successfully tested to 500,000 cycles – more than 20 times the industry standard requirement - at the UKAS accredited Mila Test Centre.

The ProStyle espag handle is available in a range of pin lengths and a choice of finishes including polished gold, polished chrome,

smokey chrome and satin chrome, black and white.

All handles come complete with fixing screws as standard.
