2XG Integra...

A revolution in door technology.

A blind inside a glass unit.
Easy to operate, never breaks down,
never gets dirty, and most importantly
gives you total privacy and security with ease.

The blind can be adjusted to any height and the slats to any angle. The slats can be angled at any height.

Trinity Range...

The new standard in decorative doors. Deep glass bevels, engraved textured glass, real coloured glass, and traditional leadwork all encased in a triple glazed unit.

Due to our policy of continuous development, we reserve the right to alter specifications without prior notice. All glass units are manufactured in accordance with EN1279.

However, only units manufactured by Door Panels PLC are covered by the Kitemark scheme. Fantasia designs contain textured finishes which negate the need for a patterned backing glass. These units are only available with clear backing glass and customers are advised that these textures are not matched to Pilkington patterned glasses.

Forte & Trinity designs contain patterned glass in the centre pane of a triple glazed unit, backed with clear glass on both outer faces. These designs do not allow the substitution of any patterned backing glass.

Classic designs are screen printed onto the surface of the glass, and contain within them frosted, opaque and patterned finishes, and are backed with clear glass only. These designs also do not allow the substitution of any patterned backing glass.
