

SUNFLEX UK 

the art of folding...

versatility, innovation, choice

The most technically advanced systems on the market, Sunflex folding and sliding doors will give your home that 'something special'. Making the most of space in the most innovative way, Sunflex folding and sliding doors will make your dream home a reality.

making the most of your home

Whether you want to replace your existing patio doors or are planning a new project - folding sliding doors will add versatility and style, making socialising and entertaining more pleasurable; your doors will be an admired feature of your home.

folding systems

SF45 non-thermal aluminium

For internal or external applications with the strength and ability to be used for commercial purposes

SF55 thermally broken aluminium (slim-line)

Narrow framework with the smallest stacking area

SF65 laminated timber

Laminated sections for strength and stability available in wide choice of timber types

SF70 thermally broken aluminium

The polyamide thermal break combats heat loss and condensation – essential for external applications

SF80 timber/aluminium

No compromise! With timber to the interior and aluminium to the exterior

sliding systems

SVG99/155 thermally broken aluminium

Contemporary design - twin or triple track sliding door system with extreme capabilities, maximising glass area with minimal framework

glass sliding turn and stack systems (SF25, SF30 & SF35)

From frameless, giving unobstructed panoramic views, ideal for balcony type enclosures and internal partitions, through to minimal vertical frames, providing an ideal economic solution for between house and conservatory

(HSW) horizontal sliding wall (SF45, SF55 & SF65)

Top guide rail with or without a bottom track - enables all panels to move and stack in a parked position

complimentary glazing

Casement, tilt and turn or fixed windows, single or French doors

features:

- severe weather rating
- high security locking system
- finger safe gaskets
- choice of inward or outward opening with wide range of opening variations
- choice of threshold options including a flush threshold
- ability to open corners and radius curves
- full range of colours and finishes

designed to perfection

Sunflex folding and sliding doors are designed and manufactured to the highest standard. Recognised as setting the benchmark in both design and technology, Sunflex folding and sliding doors are used throughout the world in all climates and it is, therefore, no surprise that they surpass the building regulations for thermal efficiency.

fresh approach

Sunflex's extensive range of products are engineered in Germany and are designed to integrate fully with each other providing a complete tailored solution to suit your individual requirements.

You can be confident of the best with Sunflex.

the great outdoors

With no barrier between your home and your garden - you won't know where one starts and the other stops. And with a great choice in colours and finishes, your home will be instantly unique.
